EDUCATION

McMaster University

Hamilton, ON

Bachelor of Software Engineering | **GPA: 3.8 / 4.0**

- **Relevant Coursework:** Object-Oriented Programming, Data Structures and Algorithms, Software Development and Design Patterns, Databases, Computer Architecture, Concurrent Systems
- **Awards and Achievements:** McMaster University Award of Excellence (**\$3000**), Faculty of Engineering Entrance Award (**\$3000**), Dean's Honor List

EXPERIENCE

Software Developer Intern

May 2026 – Present

IBM

Markham, ON

- Deployed a **CI/CD pipeline** using **Tekton**, **Github Actions**, and **IBM Cloud** to automatically validate **Helm charts** for pull requests across team repositories, validating over **xxx** pull requests annually

Software Developer Intern

Jan 2026 – April 2026

Royal Bank of Canada Investor Services

Toronto, ON

- Developed backend microservices using **Spring Boot**, **AWS S3**, **MongoDB**, **Kafka**, and **OAuth 2.0** to ingest and process **930,000** derivative instruction files annually, via **SFTP** protocol, reducing processing times by **56%**
- Built an AI-powered instruction intent classifier using **FastAPI**, **LangChain**, **React.js**, and an internal **LLM Gateway**, decreasing manual processing efforts by **78%**

Software Developer Intern

May 2025 – August 2025

Bell Canada

Mississauga, ON

- Developed an **Angular** front-end for a B2B transaction platform, converting Figma mockups into responsive UIs
- Automated regression and end-to-end test cases using **Selenium**, reducing manual testing time by **53%**
- Implemented performance test suites with **Locust** to evaluate system scalability and stability under peak Black Friday traffic of **7,000+** concurrent users

Open Source Developer

Sept 2024 – April 2025

Google Developer Student Club

Hamilton, ON

- Developed a **full-stack** mobile app using **React Native**, **PostgreSQL**, **Express.js**, and **Docker** to enhance the experience of users at one of the most elite athletic centres among all Canadian universities

PROJECTS

MacCourseRatings | *React.js, Express.js, PostgreSQL, Selenium, Pandas*

- Developed a **full-stack CRUD** application using a **React.js** front-end, an **Express.js** back-end, and a **PostgreSQL** database, to allow **100+ unique users** to rate McMaster courses of their choice
- Data scraped and manipulated **3000+ course entries** using **Selenium** and **Pandas** to create a **RESTful API** through a **Express.js** application

Traint | **×2 Hack the North Winner - Canada's Largest Hackathon** | *React.js, Next.js, Tailwind*

- Developed an AI-powered customer support training tool using **React.js** and **Next.js**, enabling real-time interaction with dynamic AI customer personas to enhance agent performance

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, TypeScript, SQL, HTML, CSS, C

Developer Tools: Git, Bash, Linux, Postman, AWS(EC2, S3), Docker, Kubernetes, Agile Methodology, Jira, Confluence

Libraries/Frameworks: React.js, Node.js, Express.js, Next.js, Angular, Selenium, Pandas, PostgreSQL, Flask, Locust
